

# REPAIR RALLYE

**We don't want to be replaced!**

Reparation has a big potential concerning the need to use less resources, so as to protect the climate, strengthen the local economy and create new jobs.

Because of their design, many technical devices cannot be repaired anymore. Spare parts are hard to find and the reparation is expensive.

**We have to rethink the way we handle our resources!**

What can be done in **politics**?

- x Guarantee a legally incorporated right to repair in order to get companies to design technical devices that can be repaired.
- x Lower the taxes on repair services.

What can be done by **shops**?

- x Point to repair services instead of constantly promoting newer and more efficient devices!
- x Offer a second-hand department pitching repaired devices!

What can be done in **schools**?

- x Enhance the status of handcraft
- x Convey the importance of reparation!

What can **I** do?

- x There are some questions to ask yourself. Do I really need this device? Is this device repairable? Isn't there the possibility to borrow this device from someone?
- x Catch up on repair cafés or organize one!
- x Become active to push the politics into improving repair policies!
